Polycrystalline Solar Panels

IN-SPC-002

Description

Cost-effective polycrystalline solar panels built with blue multi-crystal silicon cells. Designed for residential, commercial, and utility-scale applications, these panels offer stable performance, long service life, and compatibility with all major mounting systems. Ideal for budget-conscious solar installations. (Note: the price is mentioned only for 50W)

Product Price

₹2,042

GST: As applicable

Shipping: Calculated based on delivery location & weight

Dealer Price

₹1,999

Business rate valid
for a minimum order
of 100 units.

Product Specifications:

Cost-effective solar solution with lower price per watt compared to monocrystalline panels.

Distinctive blue multi-crystalline cells with stable performance in various lighting conditions.

Suitable for residential rooftops, commercial installations, ground-mount systems, and solar farms.

Long operational life with robust aluminum frame and tempered glass for weather resistance.

PERC Solar Panels

IN-SPC-004

Description

PERC Solar Panels — High-efficiency Passivated Emitter and Rear Cell modules that increase energy yield vs conventional cells. Typical commercial PERC modules deliver higher conversion efficiency and improved low-light and high-temperature performance, making them ideal for residential, commercial and utility installations. (Note: The price is mentioned only for 100W)

Product Price

₹4,800

GST: As applicable

Shipping: Calculated based on delivery location & weight

Dealer Price

₹4,700

Business rate valid for a minimum order of 100 units.

Product Specifications:

High-efficiency passivated cell technology delivers 19%–24% module efficiency.

Enhanced performance in low-light and high-temperature conditions.

Suitable for residential, commercial, and utility-scale installations.

Long-term reliability with 25-year performance and 10–12-year product warranties.

Compatible with all major mounting types including rooftop, ground, and pole systems.

Thin-Film Solar Panels

IN-SPC-005

Description

Thin-Film Solar Panels offer an ultra-light, flexible, and cost-effective alternative to traditional solar modules. Designed using advanced deposition technology, these panels perform well even in low-light and high-temperature conditions, making them ideal for large rooftops, curved surfaces, off-grid setups, and industrial projects. With easy installation and consistent energy output, Thin-Film panels provide reliable power where conventional panels may not fit or perform as efficiently. (The price is mentioned only for 100W)

Product Price

₹9,914.00

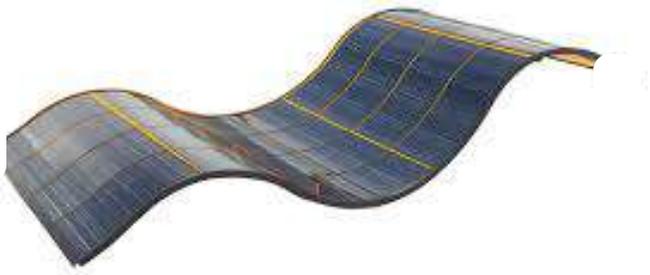

GST: As applicable

Shipping: Calculated based on delivery location & weight

Dealer Price

₹9,814.00

Business rate valid
for a minimum order
of 100 units.

Product Specifications:

Lightweight, flexible solar panels designed for roofs and surfaces where traditional panels cannot fit.

Performs efficiently in low-light and high-temperature conditions, ideal for tropical and cloudy regions.

Sleek, low-profile design suitable for modern buildings, curved roofs, and BIPV applications.

Cost-effective solution with easier installation and reduced structural load.

Perfect for industrial sheds, off-grid systems, portable setups, and large-area commercial projects.
